

TE21, Inc. Announces Partnership with [MasteryConnect](#)

-- Partnership provides educators with easy-to-use online assessment and data analysis tool --

CHARLESTON, S.C and SALT LAKE CITY, UTAH – September 1, 2015 – Today educational assessment content and curriculum company, TE21, announced a partnership with competency-based and formative assessment solution leader, MasteryConnect, which will enable teachers to assess core standards quickly and effectively, monitor student performance, and report student mastery to parents and administrators.

Through this mutually beneficial partnership, TE21 will not only be able to deliver its assessments to customers using the robust mastery platform from MasteryConnect, but educators and administrators will be given greater insight into how students are performing and understanding classroom concepts.

“In our search for a new platform for our assessments and item bank, we wanted to ensure the system we chose would best support our districts, schools, principals, teachers, and students,” says Cindy Hollar, TE21, Inc. CEO. “This partnership combines the powerful student mastery platform and strong curriculum mapping component from MasteryConnect with our assessments and item bank, giving educators and administrators tools that will help students achieve new heights in personalized learning and college and career readiness.”

By integrating TE21’s products into the MasteryConnect platform, its customers will now have access to TE21’s item bank including the company’s award-winning CASE Assessments and SCORE21 Formative Assessment Builders.

“We’re excited about our partnership with TE21 as its item bank adds valuable content to our already robust platform,” said Cory Reid, CEO of MasteryConnect. “This additional content, combined with our platform, gives teachers additional tools to ensure their students are on the best academic path.”

“The partnership between TE21 and MasteryConnect provides educators with a powerful assessment system and custom benchmarks aligned specifically to our district curriculum in core subject areas delivered through one dynamic platform,” says Dr. Kevin O’Gorman, Chief Academic Officer for Berkeley County School District in South Carolina. “The final result is an online assessment and data analysis tool that is easy to use and provides more standard-specific information for students, parents, teachers, and administrators than we have ever had before.”
